LARA D' Natural Future

Lara D' Natural Future is a line of eyewear made of **M49**, a kind of **biodegradable cellulose acetate produced by Mazzucchelli**. This choice arose from a specific desire: to use **materials made from renewable resources** and to offer a product with reduced environmental impact.

As with other lines, Lara has focused her attention on design and style, but in a more subtle way, so that the **love of nature** associated with **essential aesthetics** can emerge. Colour, a defining trait of Lara D' collections, is subdued to balance dark hues and transparent materials.

A few styles feature original details, crafted thanks to processes such as chiselling, milling and faceting, while maintaining some degree of minimalism.

With options for men and women, this line is designed for those who want a distinguished pair of glasses while staying true to conscious consumption.
